SUMMARY

Results-driven software engineer with expertise in designing and developing scalable web applications using Java, Spring Boot, and Hibernate. Proficient in database management with SQL and proficient in front-end development with HTML, CSS. Experienced in implementing secure authentication and authorization using Spring Security. Proven track record of delivering high-quality software solutions.

TECHNICAL SKILLS

Languages

mysql

EXPERIENCE

ExcellR Raising Excellence | Trainee | 2 Years

- Developed a robust backend system for a logistics project, utilizing Java and Spring Boot to ensure seamless integration with existing infrastructure.
 - Implemented a scalable data storage solution using MySQL, optimizing database performance and reducing query execution times by 30%.
 - Collaborated with cross-functional teams to design and deploy a user-friendly frontend interface, leveraging HTML5, CSS3, and JavaScript to enhance user experience.
 - Integrated API endpoints using RESTful architecture, ensuring secure data exchange and adherence to industry standards.
 - Conducted thorough debugging and testing to identify and resolve critical issues, ensuring high-quality delivery and meeting project deadlines.
 - Led the deployment process, utilizing Docker and Kubernetes to containerize and orchestrate application components, ensuring efficient resource utilization and scalability.
-

PROJECTS

Project: library management

- Developed a library management application using Java Spring Boot as the backend framework.
- Utilized Hibernate for database interactions and MySQL as the database management system.
- Implemented security features using Spring Security to ensure data protection.
- Designed and implemented a robust database schema to store library information.
- Ensured seamless integration of various components to provide a user-friendly experience.

Project: train ticket booking app

- Developed a train ticket booking application using Java Spring Boot as the backend framework.
- Utilized Hibernate for database interactions and MySQL as the database management system.
- Implemented security features using Spring Security to ensure data protection.
- Designed and implemented a robust database schema to store train ticket information.
- Created a user-friendly frontend interface using Angular for a seamless user experience.
